

QS605

The QS605 grapple processor is designed to be able to sort, shovel and load like a grapple and process, measure and cut with all the advantages of a Southstar processor. Combine your loading and processing into one effective machine. The QS605 is designed for medium to large-sized wood with an optimum operating size of 22-26" in diameter. This large multi-tree grapple processor is packed full of design features that set it apart from the competition.
